Fax 715-748-1113

Tract Indexes: All historical Tract Indexes of recorded & filed documents are available to view at no charge. These indexes are a scanned version of individual pages of the original hand-written index books that were created and maintained starting from the creation of Taylor County in 1875 until 2005 when our office switched to TriMin for our land record management software and the index was computerized.

Some entries in these scanned Tract Index pages may be difficult to decipher. If you cannot decipher an entry in the index, you can contact the Register of Deeds Office to assist. Additionally, as we are continually adding and indexing more historical records to LandShark, you will find documents on the historical indexes which are now fully indexed and will also be found using the standard search options (Document Number, Grantor / Grantee Name, Legal Description, Volume/Page or Federal Tax Liens).
